- Water Rinsable – Permits Easy Removal
- Low Odour – Pleasant to use
- Cost Effective – 1 litre has the same cleaning power as 6/7 aerosols
- Conforms to Agenda 21

Health & Safety

See accompanying Health & Safety Sheets

Description

DP200 is a safe, environmentally friendly, fully biodegradable, nonhazardous and non-flammable chewing gum remover recommended for interior use on floors (all types), carpets, furniture and upholstery.

DP200 has been formulated to release the adhesion of the gum, not melt it causing a further sticky mess.

DP200 has a very pleasant aroma and can be safely used in poorly ventilated areas.

Application

DP200 is used UNDILUTED

Moquette/Fabric Seats:

Apply directly to chewing gum and allow to penetrate.

Agitate the surface of the gum vigorously with nylon pad

Wipe over treated area with a clean damp cloth

On carpets wipe over treated areas with a cloth dampened with carpet shampoo, allow to dry and vacuum away any residues.

Floors – All Types:

Apply DP200 to gum.

Remove large lumps of gum by pulling special scraper across gum surface

Spray any remaining gum residues with DP200 and rub with a nylon pad.

Wipe over area with a clean damp cloth or paper towel.

Equipment

Clean Cloths • Nylon Pads • Scraper
