

Delta Microblitz

Ecological Stain & Odour Treatment

Specialist chemical products
& anti-graffiti solutions

Description

Microblitz is a concentrated blend of detergents and natural micro-organisms to remove and digest most types of organic soiling

Microblitz can be safely used on almost any surface, especially carpets and soft furnishings

Microblitz is effective against stains and odours caused by urine, dairy products, baby soiling, pet soiling, fruit juices, fats & cooking oils, wine and most soft drinks

Microblitz is economical in use and fully biodegradable

Application

Shake container well before use and dilute with warm (not hot) water. Only prepare sufficient solution for daily use. Dispose of diluted solutions after 8 hours.

Dilution Rates

For General Contamination:

Dilute 1:1 with water

Brush or sponge into contaminated areas, especially soft furnishings. DO NOT rinse, allow to dry slowly.

For Hard Porous Floors:

Dilute up to 10:1 with water

Wipe or brush over floors, urinals and showers to remove black mould, bodyfats, urine etc.

Benefits

- Only activated by dilution with water
- Removes odours and stains due to organic contaminants
- Non hazardous under Directive 99/45/EC and COSHH & CHIP 3 Regulations
- Fully biodegradable – environmentally friendly
- Multi-purpose – effective against organic soiling such as light oils, grease, nicotine, etc
- Non corrosive
